

TMS-Hotel Connect

PMS Parking interface

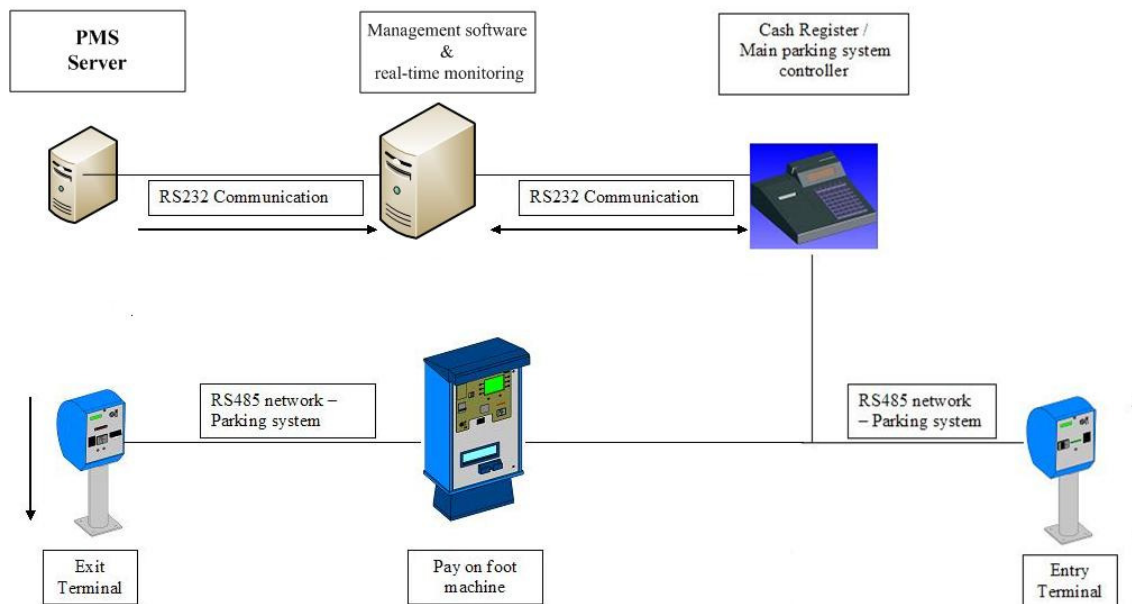

Add the power of a real-time interface between the hotel property management system and your parking system.

How does it work?

When the guest checks in, parking charges will be added to their guest folio.

Once a room key is issued, a unique access code will be encoded on their room key. In addition, the hotel PMS will notify the parking system about the guest.

The guest will then use the room key to enter or exit from the parking lot. When the room key is presented, the parking system verifies whether parking charges have been applied. If so, the gate will open and grant access.

What will you gain?

- ✓ Maximize your control.
- ✓ Maximize your revenue.
- ✓ Simplifies process for hotel front-desk agents.
- ✓ Easy room key usage auditing.

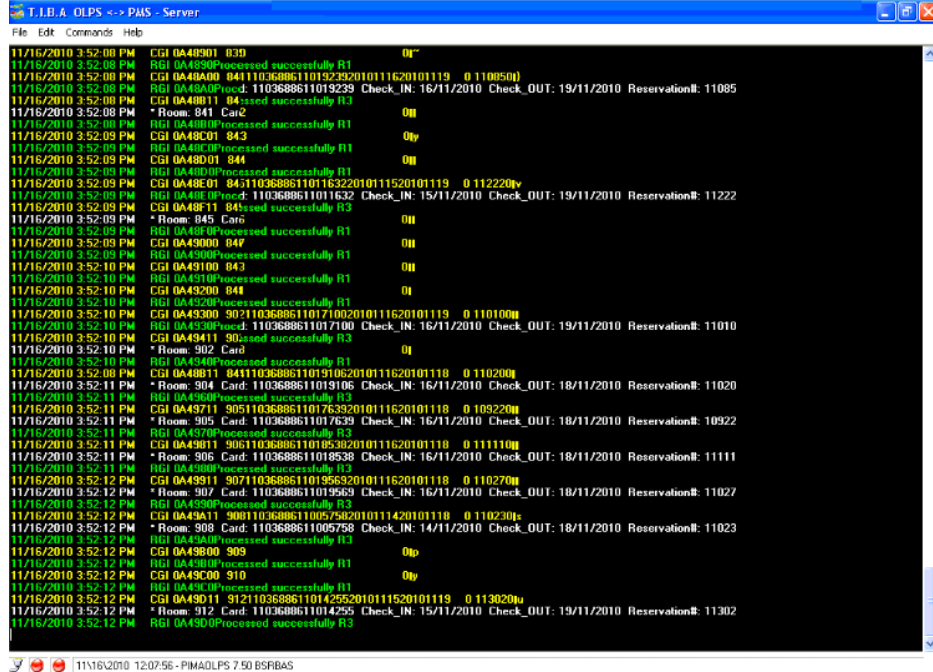

TIBA's parking management software - TMS is once again setting new standards when it comes to user-friendliness.

TMS-Hotel Connect

PMS Parking interface

Interface features

- Change to guest reservation updates the parking system and no re-encoding of the guest room key is needed.
- Exit time from the parking lot can be extended after check-out time.
- Detailed guest traffic reports.
- Grand total room key usage reports.

Parking Interface real-time screen

Full control.

Real-time monitoring is easily done from the Hotel-Connect management console.

Hotel-Connect management console

TMS-Hotel Connect

PMS Parking interface

Reporting

The Hotel-Connect module provides detailed hotel guest transaction and summarized monthly usage reports. Future billing between hotel and the parking management is quick and easy.

In addition, reports can be exported into several formats such as: PDF, RTF, MS Excel etc.

Parking lot: TIBA Parking
